

SpeedTax MANAGER™

Trouble-Free Sales Tax Accuracy
Streamlined Returns and Filing
ERP-Integrated, Web-Enabled Technology
Protective Audit Defense

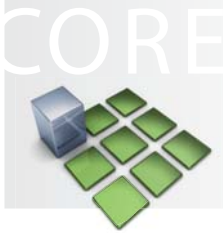

SpeedTax MANAGER leverages today's proven technologies to simplify sales tax more cost-effectively than ever before, while teaming closely with its CPA Advisory Group to ensure a highest-value user experience.

The result? A solution that delivers the practical advantages of Software-as-a-Service, and yet is designed by and for accountants to their highest specifications—so sales tax compliance can be both cost-effectively automated, and expertly managed.

THREE EASY-TO-USE EDITIONS: CORE, PLUS OR PRO

Whether automating returns and filing, integrating your ERP or online shopping cart with the SpeedTax sales tax calculation service, or pairing with an outside CPA firm to enable their oversight of your compliance processes, SpeedTax has an edition to suit the needs of your business.

SpeedTax MANAGER Core™
The essential, fully-automated calculation service, integrated to your financial or e-commerce application.

SpeedTax MANAGER Plus™
SpeedTax's full-suite service, extending functionality offered with Core to include automated returns, filing and remittance.

SpeedTax MANAGER Pro™
An expert-level automation and management service for CPA firms servicing multiple clients.

WITH SPEEDTAX MANAGER YOU GET:

Seamless integration with QuickBooks.

SpeedTax's pre-built ERP integrations are engineered only by experts with industry-leading experience with the particular ERP. The effect is an unobtrusive and time-saving enhancement to your ERP with no change to the user's existing workflow. Once the integration is complete, real-time sales tax calculations occur invisibly within Customer Maintenance, Sales Order Entry, and all other affected tasks like voids and returns, while transaction data is captured for reporting, filing, and audit defense. Address research, rate look-ups and manual error are eliminated, reducing the time expenditure on each transaction while improving compliance.

Management made simple. With simplified design, functional use of AJAX-based screen economies, and a CPA-designed interface, SpeedTax makes the defining and updating nexus, taxability, sourcing rules, exemptions, exceptions, shipping locations, SST volunteer status and other settings both intuitive and comprehensive.

Automated Returns and Filing. SpeedTax MANAGER Plus includes all of the Core functionality and no-software simplicity, but also automates and enhances your management of filing—

the review and approval process, submissions of returns, and remittances. The approval process is streamlined with built-in controls to save time and eliminate human-error. Forms are automatically populated, and changes are captured along with reason codes for full audit defense. Submitting documentation and remittance to the proper taxing authorities is taken care of for you. And, tools are built in to ensure tax-filing deadlines are anticipated so you'll be prepared with your filing obligations with a minimum of effort.

Added Intelligence. Sales tax data is rich with hidden insights that can prompt or inform business-level decisions. Within its CPA-designed, state-of-the-art online Console, SpeedTax MANAGER arms you with its executive dashboard, visually revealing trends, patterns and top-level metrics. And, with a full array of management reports, custom reports down to the finest detail, and notification options enabling pre-scheduled email updates, SpeedTax MANAGER gives you the information you want when you want it, while protecting you with a no-fear, no-hassle audit trail.

Advanced Technology. SpeedTax MANAGER ensures unmatched accuracy in jurisdiction and rate determinations, powered by the SpeedTax Service Engine™—SpeedTax's

high-performance, certified engine that is always up-to-date with geographic data, state rules, and your unique business variables. Because the SpeedTax central service is built on a rules-based engine, any change to a rule or rate can apply to all SpeedTax customers without delay. By the same token, it is also quick and easy to apply unique customer rules and variances. And, because of its inherent flexibility, SpeedTax clients can access the SpeedTax product taxability table for no added cost, a time-saving service that is fee-based elsewhere.

Modern economies. SpeedTax is a Software-as-a-Service, or "cloud-based" application. This means that not only are there significant accuracy and computing advantages over in-house tax software, but there is also a host of compelling economical advantages: there is no software or hardware to procure, IT staff is unburdened by ongoing maintenance and upgrade requirements, and a dramatically simplified implementation process makes Web-enabled sales tax automation a highly practical decision to make for businesses of any size.
